

LucaNet for financial
decision makers

FIVE REASONS WHY YOU NEED FPM SOFTWARE FOR YOUR COMPANY

VALID DATA IS LESS EXPENSIVE THAN YOU THINK

LUCANET - ALWAYS ONE STEP AHEAD

Profitable growth requires strategically valid decisions. But these can only be made with a complete picture of the company. To stay one step ahead of your competitors, you need to react quickly to market or stakeholder requirements and know your financial data inside and out. Companies that rely on traditional systems concerning this matter are at a distinct disadvantage.

Get your financial management ready for the future with LucaNet.

PUT THESE PRECONCEPTIONS ASIDE

Many financial decision makers are reluctant to the introduction of new software. They think that ...

TIME-INTENSIVE

... the implementation of new FPM software is far too time-consuming.

... they have also been working well with Excel.

UNNECESSARY

... a professional software can only be administered by IT.

IMPRACTICAL

... the costs for an FPM software are too high or the ROI is difficult to calculate.

EXPENSIVE

... the transfer of their financial data into FPM software is technically too complex.

COMPLICATED

FIVE REASONS WHY ALSO YOU CAN BENEFIT FROM FPM SOFTWARE

As a financial decision maker, you are under constant pressure to deliver real-time information, reliable analytics, or meaningful KPIs on demand. Given the growing complexity and the rapid pace at which not only the world of business is turning, this can hardly be achieved without expert software. See for yourself how FPM software minimizes erroneous data and thus compliance risks:

1 SIMPLY VALID DATA

We can easily bring order to the data jungle. Not only does the quality of your data maximize with LucaNet, it also becomes reliable and transparent. And the best part: Financial statements, financial planning, analysis, reporting, and data management are all only under one roof in only one solution! This way you can always keep an overview of your financial processes.

Both on the technical and professional side, LucaNet has been of great benefit to us. The time-consuming compilation of information for consolidated financial statements and reporting is now a thing of the past. High-quality data is the result. In this way, the future of Engel & Völkers stands on a solid and transparent financial footing.

VALENTINA SCHRÖDER
Head of Accounting and Taxes, Engel & Völkers

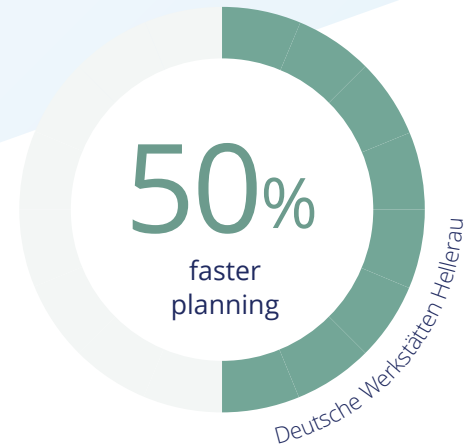

2 LESS QUESTIONS, MORE ANSWERS

With LucaNet, you can rely on an industry-independent controlling software, which covers all areas of your corporate planning in one system and enables you to automate and flexibly manage your budgeting and financial planning processes.

Instead of having to work with numerous Excel lists, I can reliably generate all the figures from a standardized system. It makes planning and consolidating fun again!

CHRISTIAN DORN
Project Controlling Deutsche Werkstätten Hellerau GmbH

3 QUICK IMPLEMENTATION

Make friends - in the team and the management! With LucaNet, you can hit the ground running: The system is easy to integrate into your existing IT infrastructure and ready to use in only a few days. With neither major training efforts nor long project runtimes. At that point, there will be nothing standing between you and professional reporting.

I was impressed with how quickly and easily LucaNet can be implemented. After only one week we had transferred all the numbers and were working with the software.

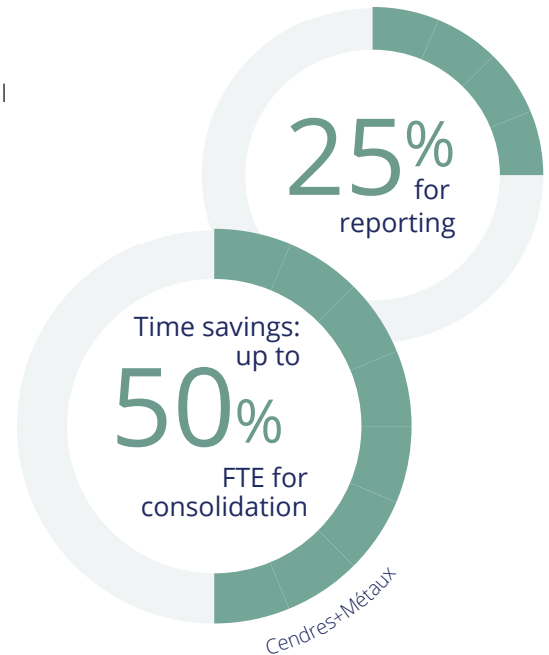

ERWIN GUTENSOHN
CFO, Vaude Sport

4 TIME IS MONEY

Simplify and automate your processes: With LucaNet, you reduce manual processes and the dependency on traditional spreadsheet-based approaches. Meaning that your finance team has an overview of all important financial figures at a glance and at the touch of a button at all times. This way you save time and money.

I can only recommend LucaNet and have not regretted my decision at any time. LucaNet is a very powerful consolidation software and very efficient for our reporting. The processes are extremely simple and fast.

DAVID TRAMAUX
Director of Finance, Cendres+Métaux

5 EASE OF USE

Gain maximum capacity for action! With LucaNet, you can independently adapt all areas to changing requirements. For example, you will be able to change account structures, consolidation hierarchies, or other structures without having to involve your IT.

LucaNet provides the overarching structure for mapping all of our financial processes. The system can be adapted to such an extent that individual requirements and industry-specific modifications can be implemented in no time.
