START PREPARING FOR FUTURE REPORTING REQUIREMENTS TODAY

LUCANET'S SOFTWARE FOR INTEGRATED ESG AND SUSTAINABILITY REPORTING

ESG REPORTING
WITH EXPERT SOFTWARE

With ESG reporting requirements set to take effect soon, are you feeling overwhelmed by the obligations you'll need to meet? Or are you already putting together sustainability reports and struggling with the amount of time it takes, or with the poor level of quality that results from having to gather ESG data manually from various source systems and departments?

LucaNet can provide you with an expert solution that offers transparency, automation, and dependability. Our software allows you to integrate financial reporting and ESG reporting in one place. LucaNet ESG and sustainability reporting accelerates the entire process while improving data quality, identifying risks, and ensuring compliance with the relevant specifications. It's designed to make this reporting a breeze – and your life easier as a result.

LUCANET IS THE SOLUTION FOR YOU IF …

- ✓ … you are subject to ESG reporting obligations (or will be soon).
- ✓ … you want to establish a single point of truth for your ESG data.
- ✓ … you've had enough of collecting data manually.
- ✓ … you need the ability to create iXBRL reports at the press of a button.

THIS IS HOW SIMPLE
ESG REPORTING CAN BE

1 Import your ESG data into LucaNet

- Import ESG data and metrics
- Take advantage of interfaces to HR, ERP, and other systems
- Administrate the ESG data of all your companies and locations

2 Implement performance analysis and reporting for ESG and sustainability

- Ensure your compliance with different ESG and sustainability reporting standards
- Analyse your ESG performance based on various metrics and KPIs
- Create ESG reports for executives, stakeholders, and investors

3 Fulfil the relevant regulatory requirements

- Integrate ESG reporting into your financial reporting
- Tag your ESG reports and create audit-ready reports in iXBRL format

HOW LUCANET CAN BENEFIT YOU

EASY DATA COLLECTION

Our software offers more than 300 interfaces to ERP, financial accounting, and HR systems (and Excel, too), which makes it possible to automate transfers of both ESG and financial data.

GET A HANDLE ON ALL YOUR DATA

With LucaNet, you'll have complete control and transparency with regard to your ESG data.

Our software helps you carry out activities relevant to ESG, including mapping, KPI calculation, performance analysis, and reporting.

REPORTS YOU CAN RELY ON

The disclosure management software SmartNotes gives you a fast, automated, and dependable way to create your consolidated annual reports – including the management reports that will need to contain sustainability statements in the future.

With the XBRL tagger, you can also convert your ESG reports into the audit-ready iXBRL format (which the regulatory authorities require).

ESG READY

? Our experts will be happy to help you with any remaining questions and demonstrate the specific support our software can provide.
