

LucaNet.Web Client –

all advantages and functions of the LucaNet front end at a glance

Visualize data on the go, present analyses and reports simply at the push of a button, put business decisions on a valid basis. With the LucaNet.**Web Client**, we remain true to our principle of rethinking finance and making the user's daily work easier.

ADVANTAGES

- ✓ Available always and everywhere
- ✓ No separate installation necessary
- ✓ Access via web browser
- ✓ Easily displayed via Android tablets and Apple iPads
- ✓ Quick and secure reporting
- ✓ Maximum data security
- ✓ Intuitive operation
- ✓ Modern user interface

FEATURES

- Displaying data from a LucaNet database in web browsers on Android tablets and Apple iPads
- (in the first version) Read-only access to all general ledgers, subledgers, schedules, and statistical ledgers from the Reporting and analyzing workspace
- Easy visualization of all numbers with a click of the mouse in different types of charts, which can be saved as images.
- Filtering of the displayed data according to your needs
- Displayed views can be exported or printed for further processing in the usual MS Excel reports
- Easily grant or remove specific users and/or user groups to allow or exclude access to data

- All existing authorizations in LucaNet.**Financial Client** also apply to LucaNet.**Web Client**
- Views defined in LucaNet.**Financial Client** can be configured for display in the web browser
- Flexible and needs-based configuration of the display
- Filtering by dimensions such as period, data level, adjustment level, organization element, or currency
- Easily switch between displaying balances and displaying transaction figures in all ledgers and schedules
- Drilldown by dimensions, for example, by adjustment levels or by partners, for all accounts and items
- Special functions for additional display modes in ledgers and schedules, such as
 - Display as period view
 - Display the organization element selected in the dimension bar
 - Display of the abbreviated or the complete consolidation overview
 - Display of all adjustment levels or all created partners of a value range

LucaNet.Web Client and LucaNet.Financial Client work based on the same data. So when data is stored in LucaNet.Financial Client these changes can immediately be requested in LucaNet.Web Client. If the website is already open, it must be reloaded for all changes to be visible. It is planned to automate this in a later update.

TECHNICAL PREREQUISITES

- ⚙ LucaNet 22 LTS
- ⚙ LucaNet.Software Manager 7
- ⚙ LucaNet.Web Server
- ⚙ macOS
- ⚙ Android
- ⚙ latest browser version:
 - ⚙ MS Edge
 - ⚙ Firefox
 - ⚙ Google Chrome
 - ⚙ Safari
